OBJECTIVE

CSE student with hands-on experience from an internship at Cloud Logic Technologies, focusing on web technologies and software concepts. Skilled in creating interactive and efficient web interfaces using HTML, CSS, and JavaScript. Eager to apply my technical knowledge in real-world software and web development projects while continuously learning and contributing to organizational growth.

PROJECTS

Reclamation Based Voice Conversion (RVC)   Sep - 2024

Technologies : Python, Audio Processing, Gradio

- Developed a voice conversion system that transforms input voice into desired output using Python and Deep Learning techniques.
- Implemented speech signal processing and feature extraction to enhance voice quality.
- Gained practical experience in AI/ML concepts, Python libraries, and data preprocessing

Multiple Disease Prediction Using ML   Oct - 2023

Technologies: Python, Machine Learning, Logistic Regression

- Built a system to predict diseases like Diabetes, Parkinson, and heart disease using patient symptoms and hospital data.
- Used logistic regression and latent factor models to improve accuracy with incomplete data.

INTERNSHIPS

Cloud Logic -Software Company,Pondicherry   July - 2024

- Built a responsive portfolio website using HTML5, CSS3, and JavaScript.
- Learned front-end development, UI/UX design, and web deployment concepts.
- Gained exposure to cloud technologies, Git/GitHub, and SDLC processes.

Nanlogical Consultancy Services Pvt. Ltd.   Jun - 2025
Software Company, Chennai

- Gained hands-on experience in developing interactive web components and implementing front-end functionality.
- Designed and developed responsive web pages with modern UI/UX principles.
- Learned practical web technologies, layout optimization, and cross-browser compatibility.
